

Recreation and Physical Activity Center

Ohio State University, Columbus, Ohio

Structures teamed with Francis Wayne, Ltd. and managed the \$3.1M contract for the completion of the General Trades work on this 160,000 SF Physical Activity Center at Ohio State University. This facility is one of the largest of its kind in the country. The General Trades contract included many unusual specialty items such as squash courts, indoor putting greens, an environmental chamber, and many others.

Dave Smith was the project manager and Tim Lowing the superintendent on this challenging contract. Dave and Tim had responsibility for managing more than 20 separate trade contractors in addition to self performed work.

Dave and Tim worked closely with Ohio State's construction manager to support the project's very demanding schedule. The \$3.1M contract was completed in just five months.
